UPDRAFT INSTALLATION

When you have successfully logged into your WordPress site, you will find a 'Plugins' category on the left hand side of the page, to install any plugin you will have to click 'Add New'.

Keyword

Now you will need to type your chosen plugin within the search bar, this will be presented on the right hand side of your site.

Once you have found your chosen plugin, in this case it'll be Updraft, you will need to 'Install Now'. Once the plugin is installed you will need to activate. Once activated, the plugin will now appear in the 'Installed Plugins' page.

UpdraftPlus

UpdraftPlus WordPress Backup Plugin

Backup and restoration made easy. Complete backups; manual or scheduled (backup to Dropbox, S3, Google Drive, Rackspace, FTP, SFTP, email + others).

WORDFENCE INSTALLATION

Keyword ▼

Wordfence

Now you want to do the same for Wordfence, this plugin will help with threat defense using a malware scanner to make sure your WordPress site is as safe as possible.

Going back to the 'Add New' page, we're going to search for Wordfence, then you will be presented with the image below. Following the same process as Updraft, click 'Install Now' and then 'Activate' once the installation is complete. Wordfence will then appear in the 'Installed Plugins' page.

Wordfence Security – Firewall & Malware Scan
